Quick Instructions for searching for a carton in Meat Messaging
(when a carton has a missing or damaged shipping mark)
Issue date:20210727

These instructions related to FSIS Directive 9900.5 Rev. 2 that was released on the 21st of December 2020. Section E Procedures for Correcting Shipping Marks when Using Barcodes, Part 4 / b states "*A report provided by the exporters that links the barcodes to the lot identified of the foreign inspection certificate*". Meat messaging provided that report by searching a single barcode and returning the full consignment list of carton barcodes.
